

Hashknife Solar Energy Center

The Hashknife Solar Energy Center is a proposed 475 megawatt (MW) solar power and 475 MW/1,900 MWh energy storage facility in Navajo County, Arizona targeted to begin operating in 2027. Solar technology uses the power of the sun to deliver clean, reliable energy and is one of the lowest-cost energy sources available.

Invested in Your Community

Clean energy projects live at the intersection of community interest, environmental stewardship, and innovative business practices. Invenergy designs projects that provide direct benefits to their host communities through new economic growth opportunities and additional funding to local organizations and nonprofits that are vital to the community's health and safety.

Project Timeline

Project Highlights

More than **\$49 million** invested in local tax revenue, land costs and lease payments, and project-generated wages and benefits over the life of the project

475 MW is enough electricity to power more than **110,000 American homes**

Up to **450 jobs** supported during construction

Up to **3 full-time** operations and maintenance staff

Emissions reductions equivalent to **280 million trees planted**

Supports local education, emergency & veteran services and environmental stewardship

Commits to developing projects while minimizing impacts to sensitive ecological resources and ensuring responsible land use

Invenergy developed project, Luning Solar Energy Center, located in Luning, Nevada

A Proven Track Record in Sustainable Energy Development

Invenergy is a leading, privately-held developer and operator of sustainable energy solutions.

A U.S.-based company, Invenergy invests \$573 million annually in the home communities where its projects are located.

Invenergy has successfully developed more than 200 projects, including wind, solar, transmission infrastructure, green hydrogen, natural gas power generation and advanced energy storage projects.
